

### Seperate check valves

1809

Check valves, fitted in air lines and water pipes prevent contamination of conveyed material at reverse pressure or save built-in strainers. Since cleaning of the lines and valves is necessary, these valves should be easy to install and remove. AWG-check valves meet these requirements.

Nominal size	Inlet thread	Outlet thread	Outside Ø (mm)	Length (mm)	Weight (kg)	Ident.No.	Remarks
52=C	G 2 A	G 2 A	78	69	0,350	30360833	
75=B	G 3 A	G 3 A	108	96	0,815	30360933
