Blank caps and adapters Storz System for pellet heating systems

1304

1208

The wooden dylinders which are used to run a pellet heating system are usually stored in storage rooms or flexi tanks. They are supplied through pellet tankers and guarantee that hose line and filler nozzle are connected safely. Adapters are securely be closed with pellet blank caps Storz System. Additional lock available.

Delivery of complete tube installation if requested.

The use of standard blank caps Storz System is possible.
