Rigid safety couplings and blank caps

1305 A

1305 B

In case a tank or pipeline is under pressure, accidents can happen when the blank cap is removed. Therefore the technical requirement for this application demands special safety couplings. Our couplings are TÜV approved and fulfil the Pressure Equipment Directive (PED) Art. P 97/23/EG. The unit consists of safety coupling, pressure alarm and safety blank cap (1305 A).
