

Dividers are used for distributing the extinguishing medium from one feed line over several hose lines, or in special cases for collecting it in the reverse direction. Each hose line can be shut-off individually by means of a stop valve. The stop valve of the dividers must be according to DIN 14365 easily operated in the usual flow direction at 16 bar and in the opposite direction at 6 bar.

### Divider with Motion Control Device

3230 M

Dividers with ball valves and additional "motion control" have two block positions which blocks the control lever in case of sudden opening or closing. Therefore only slow opening and closing possible. Built on ballvalves ND 100.

Inlet	Outlet	Balls ND (mm)	Weight (kg)	Ident.No.	Remarks
G5A	2 x G 5 A	2 x 100	18,400	10049201	Style 3230
G5A	2 x NH 2½" m + G 4 A	2 x 50 + 100	18,900	10067401	Style 3231
G5A	4 x NH 2½" m + G 4 A	4 x 50 + 100	19,600	10049501	Style 3233
