

Available are suction strainers with and without non-return valve and drain arrangement. We recommend generally suction strainers with non-return valve and drain arrangement in order to prevent discontinuities in the liquid column when the suction process is interrupted and makes it possible to fill the suction pipe run. Pulling the rope of the drain arrangement causes the check valve to open and to drain the suction hose.

Low level strainers with non-return clapper

2305

This design allows draw-off almost down to the ground and provides good stability. Oblique outlet permits better guiding of hoses through cellar windows.

Storz System Connection swivelling or thread

Nominal size	Outlet Storz swivelling / thread	Lowest suction lift (mm)	Length (mm)	Width (mm)	Height (mm)	Weight (kg)	Ident.-No.	Remarks
