

Three-way ball valves, inlet thread, 3 outlets square flange

6300

3-way ball valves to be mounted at the suction inlet of the fire pump. The valves are providing the option to draw in the water from the suction line or out of the tank of the appliance. Entry stud possible right or left. Extendable lever facilitates operation. In order to avoid kinking of the suction hose also available with 10° bent entry stud.

Nominal size	Inlet thread	Outlet flange (mm)	Total length (mm)	Width (mm)	Height (mm)	Weight (kg)	Ident.No.	Remarks
